Since we have gone to area command sitrep release ability is determined outside of our R6 REOC. I am being told that the sitrep information cannot be provided until the area command determines that it is ready for public release. The sampling initiatives are generally the same as what we discussed during Tuesday's 3:00pm meeting with WQ.

Angela, do you have something you can cut and paste from a SitRep regarding drinking water sampling activities. I can also cut and paste, if you send me some of the latest.

Thanks.

Suggested in an earlier email the topics of induced seismicity and GKM spill response for drinking water systems. Please get this to Claudia by 10 am on Thurs.

AD's

I've only received input from my Branch. If you have any bullets for this request please send them to by 10am tomorrow (Thursday).

Thanks.

Claudia

AD's,

Please note, XA is soliciting Hot Issues for the ECOS Fall meeting. Please refer to attached agenda for input and Hot Issues. Also, it appears HQ want the bullets short and concise. I will be out of the office starting tomorrow. Please forward timely input to Claudia by COB Wednesday, August 12th so she can consolidate and forward input to Carmen.

Thank you,

David F. Garcia

Hello. HQ has requested issue papers for the ECOS Fall Meeting. I've attached the draft agenda, Spring 2015 issues, and our HQ-required format. The Administrator's office has requested "super concise" bullets for the Administrator, who is delivering the keynote on Tuesday, Sept. 1, and the Deputy, who will attend the whole meeting.

Here is the language from the Adm office: Please note: general feedback is that these are WAY too long, so if you can, please try to scale back to say, a third (!?!) of what you submitted before. A single sentence, if possible.

Remember, the Adm has background on almost all EPA issues, so we are looking for a few sentences. Thank you very much for your help and attention to the Adm's request.

Sincerely,

Carmen Assunto
